Subject: Canine Health Board's proposed regulations

Dear Canine Health Board,

I am writing this e-mail on behalf of myself, my wife, and my two adult children. We all feel strongly that the Canine Health Board's proposed regulations regarding lighting, high-end temperature limits, and flooring alternatives must be approved. If passed, we believe the state will not incur any additional costs. Further, any costs incurred by commercial kennels will result in healthier animals that may in turn result in improved sales.

Most importantly, we have allowed unnecessary suffering for too long, and now have a chance to rectify inhumane conditions. The proposed regulations are a moral obligation to Pennsylvania's canines.

Thank you for your consideration in this matter.

Sincerely,

Hal R. Tucker, DO

Karen A. Pozefsky, DO
