Subject: comments to Canine Health Board

Dear Pennsylvania Canine Health Board,

I'm writing in support of the CHB's recommended regulations of lighting, control of temperature, humidity, and ammonia levels, ventilation, and exercise for dog's kept in PA's commercial breeding facilities. All of these factors will help improve the health and quality of life of these dogs. These regulations are critical to the call for breeding standards directed by Act 119 and should be approved and enforced as quickly as possible.

Sincerely,

Rob Swatski
