ATTN. Dear Canine Health Board

I (Glenn-Miriam Fox Kennel) have been advised by my state dog inspector, after a Nov. inspection to submit a plan to Canine Health Board for an alternate outdoor exercise program.

Due to my close neighbors, (7 houses within a 400 yard radius) I cannot have an outdoor, unfettered access exercise run. They do not want 70 dog barking thru the night. See attached list for the signatures. I also have pen raised Whitetail deer within 100 yards of my kennel, who get excited at the noise of the dogs, and try to jump the fence.

I would like to submit a plan, where my dogs do not have 24hr access to the run. I would like to enclose a 16 feet x 60 ft area of grass or limestone dust. The dogs could exercise daily for 30 min. Maybe 10 or so at a time. Our dogs are all small breed 20 lbs or less, and easily handled. Males and females are exercised separately. I would put a side door in kennel for easy egress, and a water source for cleanup.

I sincerely thank all of you for looking at this plan and I greatly appreciate your input as well, and I will consider any and all additions and requirements you might add. I look forward to hearing from you.

Respectfully Submitted by
Glenn + Miriam Fox Kennel
