B. There is no scientific proof this is a problem.

a. When we were a far more wood burning society in the late 19th and early 20th century there were no problems.

b. Those now using them did so at a considerable expense to save their hard earned money, now you want to make them spend more.

C. Would the statutes be written so lawyers can reap the benefits of litigation in this area, all other statutes are so written.
