Subject: Outdoor Wood Burners

JAN - 4 RECD

INDEPENDENT REGULATORY
REVIEW COMMISSION

To who it may concern,

It has come to my attention that you are trying to regulate wood burners. My husband and I put in a wood burner last year. We live in the country and the closest home to us is 1/2 mile away. We only burn wood in our burner. If you guys would take time to drive around to homes and look at burners and find out what people are burning in them I think you would be very surprised by the outcome. I never smell smoke in my house. We have very little smoke coming out our pipe. Why you ask? Because we only burn wood. No tires, oil, or trash! My husband and I are not very wealthy. We spent our savings to put in this burner and still owe money on it. Now you want us to spend more. Why don't you just make local municipalities more responsible? Also I live in the country with no one around me. It seems the problem is with heavy populated areas. I just hope if you guys do pass laws against them that they publish every name of the people that vote this into law. I am sure all OWB owners will want to know for election time.

Thank you,

Lori Klinger
