Re: Proposed Rulemaking [25 PA. Code CHS. 121 and 123] Outdoor Wood-Fired Boilers

Dear Board:

Please proceed with your proposed rulemaking regarding outdoor wood-fired boilers. I believe this is necessary to protect those of us that are effected by the people using these devices.

1. They are a safety issue due to the smoke from these things crosses the roads like a fog and drivers can not see where they are driving.
2. The smoke invades my space and the inconsiderate people using these don't care.
3. The non users' rights are being violated
4. Help protect our rights and do the right thing by regulating the use of the wood burners.

Thank you.
