Re: Proposed Rule making [25 PA. Code CHS. 121 and 123] Outdoor Wood- Fired Boilers

Dear Board:

Please DO NOT proceed with your proposed rule making regarding outdoor wood-fired boilers. I live in Potter County, Hebron Township, it is a very rural area and there are many of these water stoves/boilers in use in our area. Wood is a renewable source of fuel, is inexpensive for us and has been in use since this area was settled without problems. Many of us feel that this type of regulation should be left to the local governing body, such as: Townships, Boroughs, Towns, Cities, etc.. If done locally the people in a certain area can complain and adopt your guidelines and those of us in rural areas that do not have a problem will not be burdened with unnecessary expenses. I would very much welcome a stove design that is more efficient and gives off less pollutants if the cost is not prohibitive.

Thank you for your consideration.

Kevin Kenyon
