Subject: Regulation of Outdoor Woodburning furnaces

RECEIVED

2010 JAN -02 PM 1:27

INDEPENDENT REGULATORY
COMMISSION

I would like to comment on the proposed laws of regulating outside furnaces. I feel that the local municipalities should individually deal with this matter and that it should not be decided by a state law. We live in a rural area and it is not a problem as it could be in more populated areas. As far as banning them why should we pay to import foreign oil when we have a supply of wood and coal already available in this country. Outside furnaces also decrease the possibility of a fire in your home caused by inside furnaces. It would seem to be easier to grandfather existing units in as they are and deal with problems on a case by case basis.

Sincerely,
Ray R. & Lori J. Carver
