Subject: Proposed Outdoor Wood Burner regs

RECEIVED

2010 JAN 11 AM 9:35

INDEPENDENT REGULATORY
REVIEW COMMISSION

I believe that your proposed regulations are NOT sound.

Outdoor wood burning stoves are necessary for rural customers. Please compare the "Gross" affect of burning "Fossil" fuels compared to Wood. Consider the exploration pollutants, drilling pollutants, extraction pollutants, transportation pollutants, refining pollutants, transportation Again pollutants, distribution pollutants of Fossil fuels THEN compare to locally obtained Wood emissions. Going back in time and forcing changes to existing legal systems is as egregious as forcing a new homeowner to bring a historic home to current codes.....

Nonsensical decisions are being made that has a HUGE impact on PA's rural residents. Keep it up and we will freeze in the dark....
