INDEPENDENT REGULATORY  
REVIEW COMMISSION

ENVIRONMENTAL QUALITY BOARD

Dear Senator.

I sure hope you can do something  
about the outdoor "wood fired boiler"

I live next to one - I have Asthma & other  
breathing problems - So now I am confined  
to my house year-round - with air filter's  
& other things to keep me going - The person  
heats - doesn't live here - fire pipe goes about  
3 mile from area where he lives - I am  
in a valley - no one else living real close -  
built here to be out where you can  
walk - work in your yard & enjoy living  
~~not~~ ~~at~~ now for 33 years living was good -  
excuse mistakes I got so frustrated -  
I am 76 yrs soon 77 - & your last years  
have to be like this - All I see on news  
if we "clean up the Air" - take cars off  
road - walk & breath the fresh air -

The guy burnt for almost a year -  
Cresote R Road ties - still does garbage -  
& Coal - the green - gray smoke -

I got company - they can't believe  
you have to live in ~~this~~ this environment  
& gentleman came from U.K.P. Sunny day  
not cloud in sky - no fire in stove - guy  
ours

RECORD

who owned <sup>now</sup> ~~more~~ <sup>is</sup> very nice - He is a nice guy ~~the owner~~ - but he doesn't live in this or breathe it -

I worry about resale of my house who wants to live with this - they need much higher smoke stacks - something needs to be done!

I know my letter doesn't amount to much - I have no money to speak -

Sorry to take your time even if you read this I know you are busy -

Sincerely

Bernice Baker

Is not this bad every day - on damp  
Smoke draws in my house from <sup>damp</sup> ~~door~~ <sup>worst</sup>  
opening door till turns your eyes -  
I had new windows put in my house  
this summer - Friends from Harrisburg  
who always come to visit me because  
in a beautiful country setting - they  
can't see how this can be - Cover  
~~my~~ mouth & nose to get from car to house  
& house to car -
