

Rep. ~~MATT~~ Gabler 2802

Please help us in the proposed DEP
Regulation on outside wood boiler stacks.
We use this type of heat in our
struggle in tough economic times — we
need to feed & clothe our families.
This Regulation would force us to use
"grey" wires because these boilers are
free standing and could not support
higher stacks. As this would not
affect people in Philly or warmer
areas of PA, it will probably get
a lot of legislative support. We
ask you to please stand up for us !!

Thank you in Advance!
