Environmental Quality Board Environmental Quality Board

Dear Environmental Quality Board Board,

I support the proposed rules aimed at cutting down on emissions caused by outdoor wood boilers. The rule will protect public health by reducing particle pollution which is linked to asthma and other breathing problems, and heart problems.

Cutting down emissions from outdoor wood boilers is the right thing to do.
Thank you.

I support the adoption of the wood burner rule and hope that DEP will also enforce the rule if it is accepted.

Sincerely,

Mr. Henry Frank
