Subject: outdoor boiler regs.

I am expressing my support for the proposed regulations governing outdoor boilers. I live outside Emporium, Pa. in a mature, residential area (approx. one acre lots) In the past few years two residents have begun using outdoor wood and coal fired boilers. These have created numerous problems- Smoke stench, smoke allergy reactions etc. I burn wood myself and have for over 30 years. I am strongly in favor of requiring minimum height chimneys for these boilers. Sincerely Matthew A. Zosch, Jr. 70 Mountainview oad, Emporium, Pa.
