INDEPENDENT REGULATORY
REVIEW COMMISSION

To Whom It May Concern:

We have used an outdoor woodstove for about 15 years and find it to be an excellent source of heat at a reasonable price. We never burn garbage in our stove and only use it from the middle of October until the middle of April. The wood we use in our stove is a renewable resource and certainly helps to lower the need for imported crude oil. I don't believe that the unnecessary regulations that you are considering adopting are in the best interest of the many outdoor woodstove owners or in the best interests of our country. We have many, many problems that need addressed in this country, but the regulation of outdoor woodstoves isn't one of them.

Thank you for your consideration!
