Subject: Enviornmental Quality Board, Outdoor wood fired Boilers

Dear Enviornmantal Quality Board,

I am writing to you regarding your proposed regulation of Outdoor Wood Fired Boilers. I currently heat my home with a Outdoor wood fired boiler. If the proposed regulations are instituted I will not be able to heat my home. In the current economic environment you would force my family to purchase a new furnace (which we can not afford) to heat my home. I hope you take into consideration the current economic condiitons as well as the freedom you will be taking from me to provide for my family, before any regulations are enforced.

Sincerely
Jeff Border
