Re: Proposed Rulemaking [25 PA. Code CHS. 121 and 123] Outdoor Wood-Fired Boilers

Dear Board:

We are totally AGAINST the proposed regulations regarding the Outside Wood Fire Boilers.

With the rising costs of natural gas and oil, this is the only way that our family has been able to mainage to heat the house. We live in rural country backroads and have had no problems with any of the neighbors.

We believe that the state should worry more about the bigger issues that we have and not about outside wood boilers.

Thank you
Shane and Teresa Morgan
