Dear Sirs :

ENVIRONMENTAL QUALITY BOARD

I am against any proposed regulations on outdoor or Indoor wood stoves. First of all outdoor stoves are safer than any indoor stove. I personally do not own a woodstove. My insurance company will not cover me if I put one inside my home. I am however allowed to put one outdoors.

If your proposed regulations go through I would not even be able to consider an outdoor stove. Even though I pay the taxes on my 5.129 Acres. I own a long narrow strip of land. I feel these proposed regulations are just one more way of stealing freedoms from the united states citizens.

Burning wood is a green very cheap means of heat for many in my area. These proposed regulations will add a lot of expense to our depressed economy. Are you trying to make this country the Socialist states of America? For the last few years I have seen more and more of our freedoms and liberties taken away. So are we returning to king George? If so it may be in my lifetime that we see another American Revolution . Americans HAVE HAD IT.

Donald K. Drury
