Subject: Outdoor wood burning furnaces

Dear Sir,

I would like to comment on my opinion about Outdoor wood burning furnaces. I live in a small community where our township has allowed these furnaces to be installed. The smoke has been infiltrating our community where about 35 homes are located. I feel these furnaces should be banned in communities where homes are in close proximity to each other.

It is not fair to have to live with the pollution these furnaces cause. Please consider a ban of these furnaces.

thank you,

Joy Knepp
