Subject: OWB Proposal

Hello,

My name is Shane Myers and I live within the area of three outdoor furnaces in Bakersville Pennsylvania, one of them is right behind my house. Ever since they have been installed air quality has decreased at a extremely significant rate. During certain times of the year when the air is very wet the air in our house becomes very smokey and the air smells quite sulfuric like rotten eggs. Over the past two years both my mother and my brother have developed unusual cases of asthma.

So, please take some action that will rid this nuisance in our neighborhood.

Sincerely,
Shane Myers
