To The Board of Inquiry:

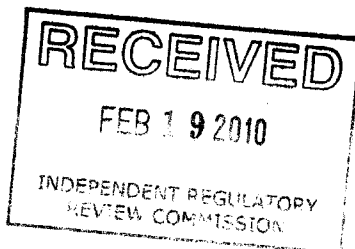

Re: Wood burning stoves and boilers

I would encourage you to leave the local law enforcement and City government to handle these few situations that completely ignore the rights of their neighbors with regards to outside wood burning stoves and boilers, burning tires and other obnoxious materials

Our over-reaction environmentally is putting millions of people out of work and loading the country with welfare culture. **Balance is needed!**—not **Police State!** nor more taxes for **non-productive** jobs.

Sincerely,

Dale Denison
