Re: New outdoor furnace regulations

- I am writing to ask you to not enact the new regulations, as this would create a great hardship for my family - we purchased a outdoor about ten years ago - we were told then it was a safe efficient way to heat our home No inside fumes, oil or gas - No inside chimney, thus no flue fires or the like

- we burn mostly hard woods. thus, it probably pollutes less than most oil or gas furnances and coal furnances. -

we do burn some trash, No tires, plastics, or chemicals. thus we do not have

OVER

a burn barrel or burn our
trash on the ground risking
setting the forest on fire as
many rural residents do
some even suburban residents
our former neighbor in
Middletown Area PA. —

so with these thoughts
in mind we ask that
you do not enact the
new unfair regulations

Thanks

David Perri
