Subject: Outside furnaces

2009 OCT 26 PM 4: 26

INDEPENDENT REGULATORY
REVIEW COMMISSION

Sirs:

With the economic crisis that has been foisted upon us by the current administration; please do not compound it by increasing the current restrictions on outdoor furnaces. Local municipalities have more than enough laws to control this situation. It could impose a severe hardship on the individuals that are currently using these systems to stay warm. Global warming is a hoax, this winter will be a bad one.

Thank you.
