INDEPENDENT REGULATORY  
COMMISSION

I am writing in opposition to the proposed wood fired boiler regulations. I am apposed to any form of state regulations specifically the proposed requirements for existing units. The requirement for a stack to extend 2 feet above any residence within 500 feet is ridicules. My house is less than 100' away and is 30' tall, my neighbor who is 400' away and up wind, he never gets smoke from my furnace, his house is also 3 stories. This is an unnecessary burden. I've had wood furnaces for 25yrs and never had a complaint. Let the local municipalities regulate them. DEP has enough to do with out regulating more.
