Subject: EQB & DEP outdoor Boilers regulations

2009 OCT 26 PM 4:27

INDEPENDENT REGULATORY
REVIEW COMMISSION

We have used our outside woodburner/boiler to heat our home and our water supply for a number of years. With the cost of heating fuel at the price it is, it has been an enormous savings. We are using trees that are down on our property and therefore I feel we are cleaning our the wooded area and using Natural Resources. I do not feel the State should place regulations on the use of these boilers.
