Subject: wood fired boilers

2009 OCT 26 PM 4:26

INDEPENDENT REGULATORY
REVIEW COMMISSION

As a Pennsylvania resident who comes home from work everyday during the winter to find his home filled with the smell of wood smoke, I am all for the regulation of wood boilers. I also have rights and one of those should be a smoke free home. My house in Kane ,Pa is surrounded on 3 sides by these wood fired heating units and they need to be regulated. I've actually had guest at my home ask me where my wood stove is because the smell in my house is so strong. I've also had to rewash clothes that were left in the dryer because the wind pushed the smoke through my dryer vent. Something needs to be done and done now. It's about time the DER stepped in and corrected this smelly problem.
