INDEPENDENT REGULATORY
REVIEW COMMISSION

Is this Russia or North Korea or China or Iran?

You stop us from finding domestis oil and gas because it might harm a bat or a bird but the foreign oil companies are raping us. Don't you think it is time you got off your band wagon. This country could be self suffient but someone will not allow it. Now you want to regulate wood stoves. It is the only thing we can afford to heat our homes. You give our social security to illegals, the new government health bill, if it passes, is going to kill us off. Yet, we are the ones paying your salary. YOU ARE FIRED!!!!!!!!!!
