INDEPENDENT REGULATORY
REVIEW COMMISSION

Subject: wood fired boilers

It's time the state of Pa gets in step with the rest of the country and clean up the air we have to breath. It's not bad enough that we have to put up with burn barrels and people burning all the garbage they can produce. If the local Gov. does not bother to regulate or care about that, then how will they do anything about control on the boilers. The DEP did not want to regulate them, but local Gov will not do it and won't do it. It's time for the DEP to put some strict enforcement in this matter and make these people become civiized. Why should my lungs pay the price for my neighbor saving a few bucks?
