Subject: outdoor wood stoves

To whom it may concern,

We have been heating with an outdoor woodstove for several years now and are very pleased with the results. We would be unable to spend the thousands of dollars to heat our home with oil. We use wood that has fallen and feel we are very resourceful, not needing to depend on foreign oil. We live in a rural area and our stove does not bother anyone. This is a safe heat for our family, we do not have to worry about carbon monoxide. This is ridiculous that this is even an issue. Does the government want everyone poor and under their thumb? Are you going to "restrict" the use of campfires or fireplaces? Lower the price of oil so everyone can afford to heat their home. What about people that live in historical old homes, I guess we should just push them over to build what the government wants. It is sad that this country is going down the toilet. We are becoming less of a democracy and becoming more communist, I am not affiliated with any political party but I am turning toward the Republican party.

Tell the government to STAY OUT OF OUR PERSONNAL LIVES, yours truely ; a disgusted Robeson Township resident, Kim McGowan
