Subject: Wood Boilers

2009 NOV 12 PM 3:08

INDEPENDENT REGULATORY
REVIEW COMMISSION

To the Environmental Quality Board:

I urge that the Pennsylvania Department of Environmental Protection make new wood boilers considerably more efficient, and make sure existing wood boilers burn as clean as possible. This is an urgent matter for the Pittsburgh region and elsewhere. A new wood boiler in Pennsylvania can currently produce as much soot pollution as four heavy-duty diesel trucks.

Thank you very much.
