Subject: ban wood furnaces

2009 NOV 12 PM 3:09

INDEPENDENT REGULATORY
REVENUE COMMISSION

I would like this entered into the discussion about wood burning furnaces being banned. I need help from someone to end this health hazard across from my home. Here is what it looks like today. Sorry by the time I got to my camera the smoke was white. Previous it was black. I have spent untold hours on this and seem to reach a dead end. Local officials don't want to be responsible so we need the state to help us out. The faster you put a stop to this the better our quality of live will be. Any one who protests this ban needs to come and visit with me. Always any one in favor of these things are welcome to see what I must live with. Move at this point my home is worth very little.
Thank you for listening.
