INDEPENDENT REGULATORY
REVIEW COMMISSION

Subject: Outdoor wood-fired boilers

Stop already with more regulations on people just trying to keep warm. The government already screwed up the kerosene with the stupid red dye that fouls up the portable heaters because they wer afraid they were losing money on the fuel tax. Now no company will deliver clear kerosene due to the cost. And no one does anything about the gasoline companys raising the rates all the time. So enough already. If you aren't helping people, don't hurt them.
