INDEPENDENT REGULATORY
COMMISSION

Subject: In Favor of Proposed State Regulation of Outdoor Wood-Fired Boilers

November 24, 2009

Dear Pennsylvanian Lawmakers:

Although I live in a rural, wooded area of the state, I am strongly in favor of the five provisions of the proposed State regulations for outdoor wood-fired boilers.

A community's right to have clean air takes precedence over an individual's right to have, purchase, sell, offer for sale, distribute or install a boiler that pollutes the atmosphere.

Meeting efficiency standards and other conditions makes sense to me and is sound public policy.

Please approve these new regulations.

Sincerely,

Larry T. Biddison
