Subject: proposed legislation on outdoor wood boilers

2009 NOV 30 PM 3:35

INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear Environmental Quality Board,

I heat my home with and outdoor wood furnace for a variety of good reasons on of which is to do my part in not relying on foreign oil. The proposed regulation of the outdoor wood boilers is too restrictive and I am strongly opposed to the excessive chimney height requirements, seasonal prohibition, and opacity requirements.

I am not in favor of any requirements and regulations at the state level. Allow individual townships and municipalities to do regulations if the local people wish.

Sincerely,

Peter J. Everett
