Subject: Comments in favor of proposed outdoor wood-fired furnace and boiler regulations

2009 NOV 30 PM 3:36

INDEPENDENT REGULATORY
REVIEW COMMISSION

Dear Environmental Quality Board:

I have read a summary of proposed outdoor wood-fired furnace and boiler regulations. I strongly support those proposed, very reasonable regulations. Without them, smoke will infringe on the lives of neighbors unfortunate enough to live nearby, on financial, health and personal freedom aspects. It is imperative that we put such regulations in place, as the use of these devices is certain to increase. There are many people who use these systems as a low-cost way to heat their homes, and that practice may be put the life and health of their neighbors in danger. This danger will be minimized by the proposed regulations.

Thank you for ruling in favor of protecting the rights of the citizens who have to live near outdoor wood-fired furnaces.

Thanks,

Steve Todd, PE, LEED AP
