Subject: WOOD BURNER REGS

2009 NOV 30 PM 3:33

INDEPENDENT REGULATORY
REVIEW COMMISSION

I'm against any regulations that have to do with wood burning stoves or boilers. This is a major source of heat for many citizens of Pa. and restricting the use of them will force them to use fossil fuel which are not a renewable resource like wood is. Times are getting tough in America and we don't need anymore rules or regulations to make it harder.

Thomas Stewart
