**Subject:** Outdoor wood burners

2009 NOV 30 PM 3:35

INDEPENDENT REGULATORY  
REVIEW COMMISSION

I have chosen to use Wood to heat my home, and hot water, to reduce our nation's dependence on foreign Oil. Wood is an abundant **renewable** resource here in Pa. Heating with wood has no net increase in global warming gas emissions. I am requesting that you preserve my right to continue to burn wood in my outdoor stove. I am supportive of reasonable requirements such as burning proper wood fuel and not creating a nuisance for my neighbors. However the current proposed legislation would be disastrous financially for many people that have purchased stoves, and would be counterproductive to reducing green house gases. I believe the vast majority of outdoor wood furnace owners are responsible citizens. Please don't penalize the 98% that are responsible wood stove owners, for the 2% that are not.

Sincerely  
Tim Kuhns
