INDEPENDENT REGULATORY  
REVIEW COMMISSION

**Subject:** proposed regulations from the state's Environmental Quality Board that would place significant restrictions on the use of outdoor wood-fired boilers in Pennsylvania

**I am against the proposed regulations from the state's Environmental Quality Board that would place significant restrictions on the use of outdoor wood-fired boilers in Pennsylvania.**

**We already have laws against trespass and nuisance and don't need a statewide, or perhaps eventually, a federal law regulating wood stoves.**

**Let the town, borough and or township deal with it, NOT SPENDELL IN HARRISBURG!**
