REVIEW COMMISSION

To Whom it may concern, my name is Kenneth E. Miller of 1208 Pine Bark Lane
Mifflinburg , Pa. 17844

Phone

#570-966-3621

Many years ago our Founding Fathers paid a high price for Freedom , and with this Proposed Rulemaking is one more step to the down slope of lost Liberties, because, there are a few who do not abide by the proper use rule in the manufacturer guide lines , and also give no concern for the safety and health of others,, Neighbors, children ,and elderly. I do therefore believe, that it is absolutely necessary for some rules to be applied. CATALYTIC CONVERTERS should be considered, and used in the reduction of hazards (Carbon Dioxide, Carbon Monoxide and soot) created by the Wood or coal Burning Furnaces. My Complaint is that there are two OWBs they are in place at the distance of 324 Ft. and 273 Ft. (according to a Laser Range Finder) there is a home that the one furnace is only 20 feet away from and 10 feet from the property line, now where is the common sense is this installation, like I said earlier, because of a few who do not use the thought process of how what they do and its effect on others, we have to make more laws!!! Therefore MAKE THE LAWS!!!! And with this I send to you a picture of one OWB in operation, now you decide.

Thankyou

Kenneth E. Miller
