**Subject:** Outdoor wood furnaces

DEC 7 REC'D

INDEPENDENT REGULATORY  
REVIEW COMMISSION

Your regulations regarding outdoor wood furnaces are fine for new installations, but due to the topography at my home, I could not meet your stack requirements. I cannot afford to move my furnace. Please exempt existing furnaces from stack height requirements. I live in mountains. My stack would have to be 40 feet high and self supporting to meet your regulations. I would have to rent a bucket truck to cover the stack in the summer months, if such a stack could even be provided. I do not run the stove in warm weather as a courtesy to my neighbors. I run propane hot water in the summer.

Please do not take my heat away.
