Subject: Proposed State Regs on Outside Furnaces

INDEPENDENT REGULATORY
REVIEW COMMISSION

We are fully supportive of the proposed state regulation of outside wood furnaces and hope that regulations regarding indoor wood stoves will be forthcoming.

Wellsboro is fast becoming inundated with acrid wood smoke and both the America Lung Association and the American Heart Association state that woodsmoke is as dangerous to ones health as second hand cigarette smoke!

Thanks so much for your concern and for all you can do to alleviate this deadly problem.

Please keep us posted!

Sincerely

Ron and Jackie Patt
