**Subject:** State Regulation of Wood-Fired Boiler

RECEIVED  
DEC 7 REC'D  
INDEPENDENT REGULATORY  
REVIEW COMMISSION

I fully oppose the state regulating outdoor wood-fired boilers.

Although I do not currently own an outdoor burner, I do heat with wood. Wood is a renewable and plentiful in this area.

Families move to this area because of the lower cost of living. Unfortunately this areas wages are almost at the poverty level. Individuals should have the right to chose an alternate heat source other than electric & gas.

The economy has been poor, why put regulations on wood-fired boilers when there are much more important areas of concern?

Outdoor woodburners are much safer than indoor woodburners.

Again, I am opposed to the state regulating outdoor wood-fired boilers.

Sincerely,

Cynthia Walton
