INDEPENDENT REGULATORY  
REVIEW COMMISSION

If high fuel oil prices and ending electric caps aren't enough. What are you trying to do to people trying to survive these tough economic times? I thought the federal government was FOR alternative energy sources. Wood is a renewable resource and the great state of Pennsylvania is blessed with it. It may not be oil but it is ours. A lot of people have already made tough commitments to help with energy independence. Why not try to do something really helpful and help your buddies balance the state budget.

Leave this alone.

Drew
