Subject: Purposed Outdoor Burner legislation

DEC 7 REC'D
INDEPENDENT REGULATORY
REVIEW COMMISSION

Purposed Outdoor Burner legislation

I would like to make my position known to the committee reference to the bill which would regulate outdoor burners. I am a police officer in a small town in the northern tier of PA (Bradford County) I see a number of these heat sources in our community, and surrounding community. I would ask that you consider NOT further regulating these types devices. I strongly feel that if there is a need for further legislation regarding this, it should be left up to the Municipal Government. A large percentage of the out door burners in our community use these because it is safer than having a wood fire inside the structure, and because they can not afford oil, gas or even electric heat (which the cost is going to increase more and more with deregulation).

Please take this into consideration when you review the legislation, and vote against it.

Respectfully
Floyd McDonald
