DEC 7 REC'D

INDEPENDENT REGULATORY  
REVIEW COMMISSION

I currently heat my house with an Outside Wood-fired Boiler and I am very concerned that PA DEP has proposed regulations that could affect the way I heat my house. My family and I live in a rural area and have used this as a source of heat for over 3 years. None of our neighbors have ever complained and many of them burn wood in fireplaces or inside wood burning stoves. The outside wood burners create no more smoke or smell than anyone using a woodstove or fireplace inside a home.

Is our government trying to force all of us to burn fossil fuel??? I truly hope not as I have a source for wood and my intention was to try to cut my own oil use...

Respectfully submitted,
