I live in Oil City, Pa and I have great concern about the outdoor wood burners. I know a man that has severe asthma and he has a neighbor near him this man burns his garbage as well as plastic jugs, etc. This man cannot go outside when this neighbor is burning it just pollutes the neighborhood. And when he is burning wood you cannot see because it is so smokey. Please do what you can to do something about these outdoor wood burners they are a nuisance to neighborhoods and they do risk the health of people especially people that have breathing problems, I feel for this mans health. Mrs Stephen Hartle, Oil City, Pa 16301
