Subject: Wood fired boilers

2009 DEC 17 PM 4:08

INDEPENDENT REGULATORY
REVIEW COMMISSION

The regulation of the boilers should not be left to the PA EPA to regulate. This should be left to municipal governments, which are already empowered to do so. There are vast contrasting living situation within the Commonwealth and a uniform regulation would not best serve the State. Rural areas should not be regulated the same as municipalities. In some areas where natural gas is not available wood fired boilers are an affordable option to home heating. These new regulations would put extra financial burden on a rural resident that, in my opinion, is un necessary.

I sincerely hope this proposal will be reconsidered.
