State Regulation of Outdoor wood fire Boilers
To whom it may concern

I am writing about the proposed regulations concerning outdoor wood fired - Boilers. I have been using an outside stove for 14 years. The proposed regulation about smokestack height would prohibit me from using my outside stove. I could not erect a stack high enough to meet the regulation. It would cost me a lot more money to burn natural gas or use electricity. (Big Government is strangling me.)

Thank you Charles H Brackman
