Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. Do not take our state's water eco system for granted. Please do what's right for ALL Pennsylvanians and vote to protect our water systems.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

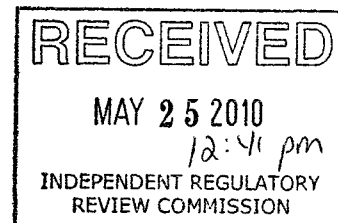

Sincerely,

Mrs. Maryellen Alviti  
 7B Grove Ave  
 Flourtown, PA 19031-1906

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

In the not too distant future, the most valuable resource of Pennsylvania will be its water - - hopefully clean enough to drink.

PLEASE do not destroy the future of my children and grandchildren by allowing the pollution of our groundwaters that feed the rivers and streams AND "feed" us, in our needs for clean, safe drinking water. We must be sure the gas drilling wastewater which has been infused with chemicals for the fracking process MUST be treated to remove those chemicals -- all chemicals -- not just ones on the lists of current wastewater treatment facilities. We don't want another "Love Canal" disaster anywhere in this gorgeous state of ours. We don't want to jeopardize the future health of our residents with possible carcinogens and unknown effects of these chemicals.

Think about our children.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

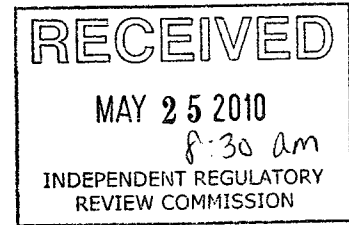

Sincerely,

Dr. Carol Gold

Mike, I know you'll agree that Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. The Sierra Club, who sent me this, seems to do a good job of trying to protect our streams by supporting legislation that promotes clean drilling. They feel that these two regulations do a good job of preventing untreated drilling wastewater from entering our streams.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. Dan Etter

PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

We must protect our earth. Our water sources are so challenged, please start making the necessary change to move toward clean energy and change laws to protect our water and earth!!!!!!!!!!!!!!!!!!!!!!

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

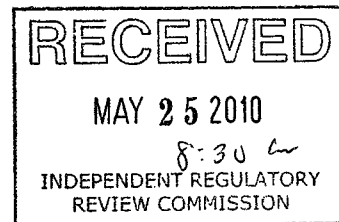

Ms. Sandra Long-Ekomin  
214 Old State Rd  
Gardners, PA 17324-8935

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

I am very concerned that drilling for gas in the Marcellus Shale is being rushed through, without giving much thought to our underground water supply. This water has been pure for millions of years and must be protected. Everyone who lives in Pennsylvania can be affected if our water system is contaminated. Please make protecting our water supply your highest priority. Thank you.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Ms. Deborah Kalbfleisch

To whom it may concern:

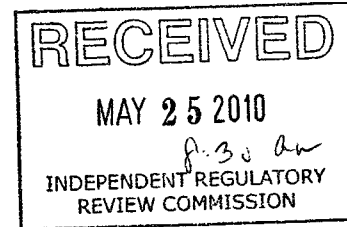

I routinely visit the parks around Appalachia and I am especially fond of the Laurel Highlands. Pennsylvania has so much to offer the outdoor enthusiast, and that needs to be preserved in this time of corporate profits being more important than even life itself. I urge you to take whatever steps necessary to keep fossil fuel companies out of Pennsylvania's mountains and hills.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

My own property is graced with a small stream of fresh water that supports crayfish, frogs, and small fish. This runs through my garden.

I have been approached twice by drilling companies who have expressed interest in drilling for gas on neighboring properties and wish to secure rights to go under my land as well. I have suffered a brutal loss of my professional status due to age discrimination and retaliation once I reported it. I received no help from the EEOC after a year of waiting and have had to adjust to a greatly reduced income and loss of my retirement plan yet I am not tempted to exploit this beautiful piece of land where I reside. We Americans have taken an unspoiled continental land from its native peoples who were good stewards until we overpowered them and began to exploit the natural resources as rapidly and coarsely as had been done in the old world except that with more modern techniques we have accelerated the despoilation. We must learn to live on this increasingly crowded planet without rendering it fouled and unlivable.

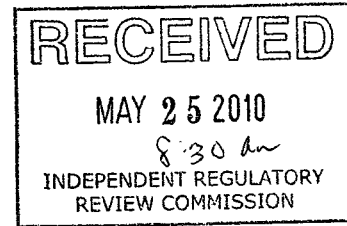

It is late in this evolutionary process. We MUST direct our talent, financial resources, and focus toward developing forms of energy which are less damaging to the environment than finite fossil fuels if we are to survive on the planet as it remains. Please do the right thing.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. Gregory Peterson

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Also, on a personal note. The water that we receive into our house comes from the Monongahela river; it scratches the dishes in the dishwasher, it kills the fish in our fishtank and pond. It clogs the filters on our faucets. We have to go 45 minutes away to get our drinking water from a spring high on a mountain. These considerations are not as important as the long term effects on our environment, our world, but they still have a huge impact on our personal lives.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Please take a pro-action stance now and support the amendments stated above so gas drilling wastewater will be treated before being discharged into our rivers and streams. By acting now, we can prevent damage to our waters and avoid a potentially complex, dangerously, and very expensive problem later. Job loss is not the issue here--those lost (if any) due to restrictions will be replaced by new jobs created to treat the drilling wastewater. Profit loss is not the issue either as I am sure that these companies will find different/better oil exploration methods that do not harm the environment when forced to do so.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

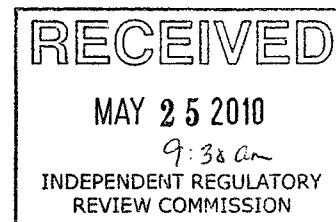

Sincerely,

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

It is past time to protect our environment--our streams, creeks, rivers, bays and oceans; our wildlife and the land upon which we live.

This is a gift to us, not something we earned and just as it was given, it can be taken away. We humans are to protect our earth, her water-ways and her animals. Please support Regulation Nos. 2783 and 2806. Thank you.

Muriel W. Coppage

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

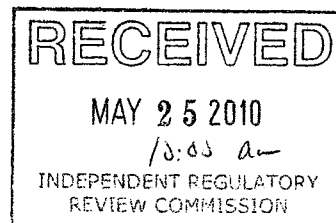

Sincerely,

Ms. Muriel Coppage

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

There has been enough damage to streams from uncontrolled well drilling and strip mining in the past we do not need to repeat the mistakes of the past.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

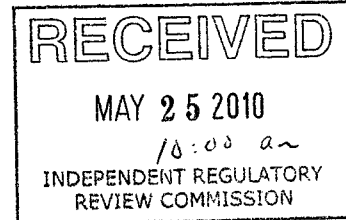

Sincerely,

Mr. Richard Bukowski  
5196 State Route 308  
Kennerdell, PA 16374-1712

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Water is everything. Not only our drinking water, but the homes of millions of animals and plants that share the planet with us. They host the animals and plants that are the beginning of the food chain for thousands of the animals and plants that also share the planet with us. And they were meant to do these things. That's why they are there. They were not created to host human waste and pollutants. And they were meant to be there they way they are, not changed or re-directed in any way just for us.

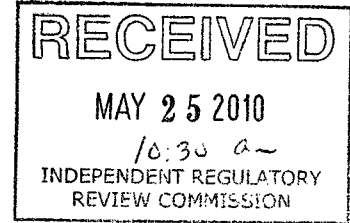

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

I know you think all is fine with the gas rush here, but we need some basic protections and this is a no brainer. If it is affordable for some facilities to recycle what they can and ship the rest to Ohio or whoever is temporarily desperate enough to take it, then that proves it is not an undue burden on the gas developers and all should be regulated to conform to the best possible standards and practices. If it gums up the works until enough facilities get online, who cares anyway, as you know damn well, most landowners aren't going to be seeing royalties from the drilling activity going on now, most of what is happening is just to tie up the leases. When are you going to start looking out for us and not them? Why do you want to roll over like a submissive puppy for these vultures? Afraid of scaring off the infant industry? No taxes, no sensible protections, give us a break Mr. Senator.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

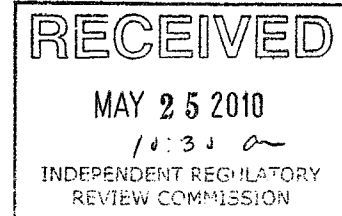

Sincerely,

Mr. Ralph Klsberg Klsberg

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I live along the Yellow Breeches, but I also have ties to Susquehanna County (where I grew up) where the land is being decimated by recent drilling activities. I am sick seeing what is happening there. PA waterways are a source of beauty as well as sport (fishing) and tourism. They ultimately sustain life as we know it, and the quality of our waterways affects our own health. Our own well system depends on the surrounding areas, both land and stream, to be healthy!

Please do whatever you can to support these new regulations!

Thank you!

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

It is shocking that the gas companies were allowed to bypass the clean water act to begin with. PLEASE rectify this situation, and do your part to require that the the wastewater be treated. In addition, please require that the gas drilling companies reveal what aggregates they use in the drilling. There are many horror stories - true and untrue - about the chemicals they use, and the effects is has on water, land, animals, and humans.

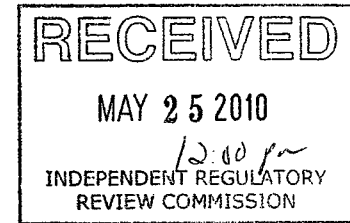

Thank your for your help.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Remember, also, while Allentown gets its drinking water from an underground river, Bethlehem, Whitehall, Phila, Catasauqua, & Bucks & Montgomery get their drinking water from small rivers & streams.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. Carl Coleman  
2863 Klein St Apt 8  
Allentown, PA 18103-7411

IRRC Regulator  
PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Do you want PA to become the next West Virginia? We cannot know the horrible impact of polluting our rivers and streams will have.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

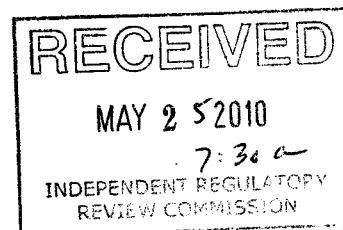

Sincerely,

Ms. Benita Campbell

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I have done a research project for my class in Earth Literacy at St.

Mary of the Woods college in Indiana. It was based on the drilling.

There are known cancer causing chemicals in the water used in drilling.

The diggers have emptied a stream in Eastger PA. they pay nothng to local communities for ruining their roads, creating dust with their trucks pollutes the air, puts a strain on municipal resources, crime increases. They don't pay for the water they remove from our streams.

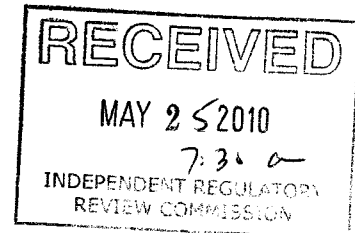

They pollute ground water whent he cement casing crack or break. They overestimate the supplyof gas and oil available. And they will have to come back to the dig in a few years to make it deeppear to get at more oil and gas. Protect my habitat and yours and our children's. Put the money into long term development of solar and wind power.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

I am a Northeast Pennsylvania native. I saw firsthand the devastating environmental costs of deep coal and strip mining in our Region. Only now, after significant time, effort and costs, and the gracious hand of Mother Nature, have we started to fully erase the scars on our land and water.

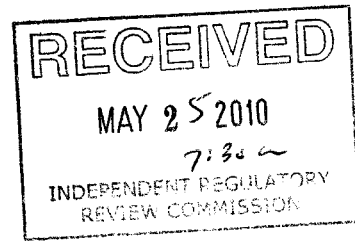

I find it egregious that our State Senate and Representatives and regulators are willing to again sell out to big energy and their payoff lobbyists in a failure to adequately address the real long term costs of deep well natural gas drilling. Consider the real long term costs of the contamination of drinking water, rivers, streams, and our beautiful public park lands and loss of wildlife habitat. We need strong regulation and oversight by expertly trained technicians and a tax structure favoring us, not the big gas and their lobbyists! As a start please support the regulatory amendments before the IRRC. This is a positive step in ensuring the adequate protection of our Region's environment. Recognize the powerful natural gas - Marcellus Shale industry for what it really is and the potential for long term environmental disaster. And realize that the big gas cares little about the long term costs to the residents and the future generations of our Region.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Many of PA's waterways serve as sources of drinking water for thousands of PA residents. High TDS water will kill many aquatic organisms, including trout and the insects on which they feed. Many of PA's industries depend on these same water sources and cannot run their businesses if TDS is too high.

Given how damaging high TDS levels are to human health, to our economy and to other organisms living in or drinking high TDS water, it makes sense for DEP to propose stronger and more protective TDS standards.

Lobbyists for the gas industry are working hard to keep DEP from enacting these new standards. Please vote for the interests of ALL PA's citizens - not for the few whose interests are solely for making money from gas extraction.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

We need to stop all drilling for natural gas, and the devastation it would cause to our water supply. We need to replace antiquated energy sources such as that oximoron they call "clean coal" that kills miners and defaces our hillsides with

**NEW PHOTO VOLTAIC PANEL MANUFACTURING PLANTS!**

**WE NEED TO CATCH UP WITH CHINA AND NOT LET THEM TAKE OVER WORLD DOMINATION AS LEADING NATION!**

We need job security that will not kill our children - or us!

We may still have a chance to survive ourselves if we act now!

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

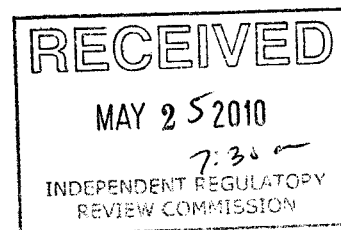

Sincerely,

Ms. Dot Montaine  
 213 Hamilton St

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Drilling for natural gas in deep wells consumes freshwater and results in the discharge of millions of gallons of contaminated wastewater. At present, drilling for gas in the Marcellus Shale is causing harm to our rivers and streams because wastewater produced by gas drilling is being discharged without treatment for dissolved solids - mainly salts and sulfates.

The Department of Environmental Protection (DEP) has finally recognized the discharge of untreated wastewater from Marcellus gas wells as a significant environmental problem.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Dr. Sharon Brown

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

While it may be necessary to develop shale gas, we must not do so at the expense of our water supply and the land which provides the basis of our agriculture and tourism industries. These are our two largest revenue generators.

It is critical that these mostly out of town drillers pay their own way and not leave commonwealth taxpayers with the bill. At this early stage of development, they have already ecological damage, and left roads in shambles.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

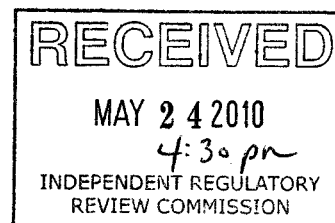

Sincerely,

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I have a second home on one of the most unspoiled waterways in the Commonwealth, Pine Creek in Cummings Township, Lycoming County. In March the stream was polluted with a foamy discharge from a gas drilling operation located about a mile upstream from my place and the same spill threatened a high quality trout stream that runs through my land where it empties into Pine Creek. This incident highlights the need for stringent regulation of this industry if the beautiful wilderness areas of our home state are not to become an industrial waste land.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

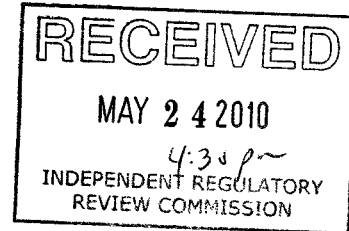

Sincerely,

Mr. Mark Givler

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. The water coming from all of these streams are not only fished in, but played in by our citizens. If this water becomes polluted, it will stifle the growth of everything that eats fish from them, as well as drinks water from them. Animals don't have the ability to distinguish pollution in the same way that we do and sometimes they suffer needlessly for it. Please stand up for them as well as us!

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

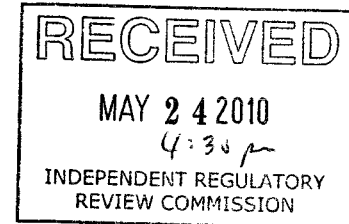

Sincerely,

Mr. Brian Miller

As a hiker and camper I appreciate the quality of water available to me as a Pennsylvanian. Our water is a tremendous resource that we must safeguard at all cost. The world is going to need more water in the future than it has and all sources of clean fresh water will be very valuable. It is therefore important that we protect ours and make sure that they will be an asset not a liability when the world starts thirsting for water it does not have.

Please support the legislations Nos. 2783 and 2806 before the Regulatory Review Commission.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. Decades after passage the Clean Water Act was Pennsylvania government has failed to adequately protect streams and other waterways. Negligence in establishing appropriate water quality standards has been the hallmark of state government. More than half the streams in the state are so seriously impaired they cannot support sustainable natural systems. Buffer zones are the minimal requirement, but will not sustain/restore stream ecology. You can do better. Thank you for you consideration of my remarks.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Having grown up in Susquehanna County I enjoyed the pristine streams as a young fisherman.

I have now since moved to Luzerne County where the streams are of much worse quality. I work every day to educate people on the environmental degradation that one industry, anthracite coal, caused and fear that another industry, gas extraction, will now impact even a greater area in Pennsylvania.

I believe we have only seen a prelude to what will come with the accidents near Dimmock, PA. I know full well the cost and time that it takes to reverse stream pollution due to Abandoned Mines in Pennsylvania. The industry was unregulated up until 1977 with the passing of the Surface Mining Reclamation and Control Act, which stopped the rampant miss-use of our natural resources. This time of "lax laws" allowed approximately \$15 Billion worth of damage to Pennsylvania's lands and streams. We cannot allow this to happen again.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

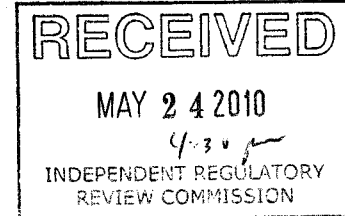

Sincerely,

Mr. Mike Hewitt

PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Living in the rural part of the state, we have even a closer knowledge of and relationship with the rivers and streams.

And as drilling is already going on all around us, we have seen the beginnings of the degradation of this essential resource.

There is still time to both manage the incredible potential from the Marcellus Shale and protect and preserve our environment.

Please support all efforts to be wise and responsible stewards of all our resources, for us and future generations.

Thank you.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Ms. Cindy Zembryki

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Having met you some time ago, I was impressed with your concerns about the environment.

I know you are a stalwart protector of the agricultural interests in PA and farmers are already under pressure to minimize toxic runoff into our rivers and streams. So I join with the Sierra club in asking your support to enact controls on the gas, oil and mining industry that will provide for environmental protection. Let's make it easier on the farmer's efforts by controlling all other forms of water pollution.

I also have an interest in the efforts to save Chesapeake Bay by controlling toxic runoff. These moves to amend 25 Pa.Code Chapters 95 and 102 will be a major improvement to solve runoff problems in all these industrial sectors that effect both PA and the greater Chesapeake basin.

Thanks for your attention to this request. I hope to meet up with you again soon.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. Furthermore, the only way for the marketplace to make informed choices between alternatives is if those choices are priced accurately. An accurate price on any fossil fuel must include the costs of by-products, of both production (e.g., wastewater) and consumption (e.g., air pollution), because those are costs that must be paid (whether in clean-up, or environmental damage and public health). Yes, regulation will cause prices to rise, but our society needs those prices to rise, because only when all costs are fully accounted for can market forces operate efficiently, leading to decreased consumption, or greater demand for non-polluting alternatives (which will then be relatively more economical than under the current system, which allows legacy energy sources to externalize certain costs), or both.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

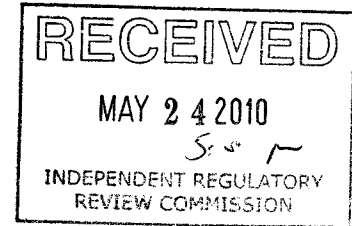

Sincerely,

Mr. William Montgomery

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

By disrupting the environment and the ecological habitat of our streams you are hurting not only the environment, but business for Pennsylvania. Fishing and Hunting is affected by these problems we are discussing. Waste and pollution affects beavers, raccoons, muskrats, waterfowl, hawks, owls, snakes and many more species, each having a direct balancing of each other. Example beavers provide habitat for water fowl by providing clearings and nesting areas for mallard ducks.

Which in turn provides food for hawks and owls. Who also feed on snakes who in turn eat rodents that destroy crops and ecology. Small rodents depend on our streams and rivers for food, water and shelter who also are the basis for the food chain. By affecting and disrupting these very fragile ecosystems you will be in turn disturbing the entire food chain all the way up to us. Muskrats are an excellent source for hunters to obtain money and as well as hunting licenses from the state which is taxed. please support a state that has been a farming and hunting community since our early establishment in the 1500's. thank you for your support. REMEMBER WE THE PEOPLE ARE THE VOICE OF REASON FOR THOSE WHO SERVE IN OUR PUBLIC OFFICES, WE ALSO HAVE THE POWER TO OVERTHROW YOUR POWERS AND REPLACE IT WITH A SYSTEM WHICH IS JUST AND IN FAVOR OF OUR IDEAS, NOT BIG BUSINESS!!!!!!!!!!!!!!

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

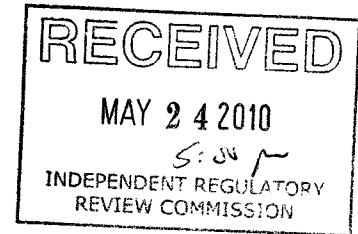

Sincerely,

IRRC Regulator  
PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I have a number of friends in Sullivan County. While they are benefiting from Leasing exploration rights, even a number of them have been concerned that the gas companies have not told them everything.

Obviously, their suspicions were right. Many of these people chose to live in that part of the state because of its unspoiled beauty. No one I know is opposed to the exploration, but they certainly expect the gas companies to keep their promises that it would not harm the area.

Without reasonable regulations, someone's attempt to make a quick short-term profit may spoiled the area for generations.

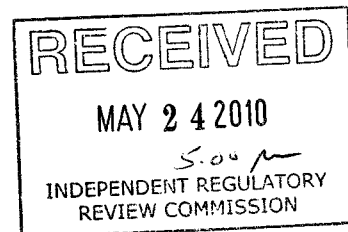

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. John Seehausen  
3995 Yerkes Rd

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's constitution mandates protection of our natural resources\*

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

\*Natural Resources and the Public Estate Section 27.

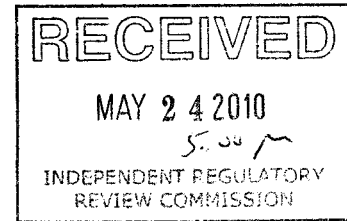

The people have a right to clean air, pure water, and to the preservation of the natural, scenic, historic and esthetic values of the environment. Pennsylvania's public natural resources are the common property of all the people, including generations yet to come. As trustee of these resources, the Commonwealth shall conserve and maintain them for the benefit of all the people.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. John Cosgrove  
613 Red Fox Ln  
Easton, PA 18040-7550

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Dear Senator Greenleaf,

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. Our state and federal governments have long allowed the coal industry to poison our drinking and recreational waters (and our air and lungs) through all parts of the coal cycle, including irresponsible disposal of coal ash. Now another extractive industry, the gas drillers, is pursuing another fuel in a dangerous fashion, which will net them instant wealth and leave our water destroyed far into the future.

While natural gas is a clean-burning fuel, which can be used to bridge the gap between dirtier fuels and the renewable energy sources to which we must rapidly transition, we cannot allow ANY gas drilling to occur on private or public land unless it can be done WITHOUT harm.

For the past several years, I have made documentary photographs to show how the coal industry is destroying the land, air, water, and human health. I am now beginning to also photograph of the sad and avoidable results of drilling for natural gas in the deep Marcellus Shale formation.

We simply cannot trust our most precious or resources to the greed of an extractive industry, and the short-sightedness of any governmental body.

Thank you.

Sincerely,

Mark Schmerling,

Huntingdon Valley, Pa.

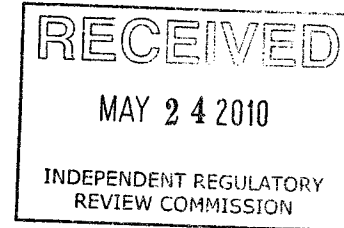

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

The gas drilling that has come to the eastern part of the state is going to ruin our wetlands, well water, streams and rivers. Please vote to not exclude them from the clean air act, clean water act and other bills coming before you. If you vote for letting them pollute our water and streams and homes with toxins that we do not know all the names of because of the haliburton lopehole, you are voting against Pennsylvania.

Please watch Gasland on HBO, June 21st. A documentary by Josh Fox. He lives 10 miles from me and his movie will show you what the people of Pennsylvania are up against. If you think the gulf spill is bad, and it is a castrophy, wait til you see this state polluted for all time. I am angry and you should be too.

Please protect our streams, lakes, wetlands, rivers, and wells.

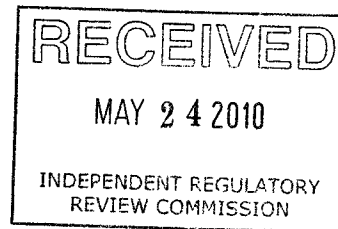

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Ms. Sandra Cundiff

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Shame on you and all in charge regarding this abundance of gas drilling to take place in PA if you fail to carefully regulate these operations and if you fail to require a buffer zone for rivers and streams.

Gas companies are more than happy NOT to have any of these regulations.

That's just too bad. I have no pity for them. They are already getting prime drilling areas handed to them on a silver platter so the least they can do for us and our Environment is to follow complete

safety regulations. It's bad enough oil companies like BP end up corrupting the entire Gulf Ocean ecosystem. We don't need similar environmental corruption in Pa.

Thank you!

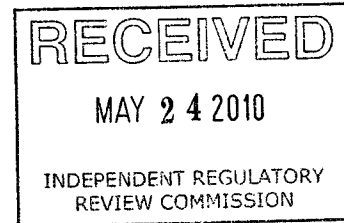

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Ms. Lisa Augustine

Dear Senator Washington,  
Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. The use of benzene (an EPA listed, potent carcinogen) by those engaged in the process of drilling for natural gas poses a serious threat to groundwater in Pa. It is vital that we protect this precious resource from careless, and thoughtless exploitation.

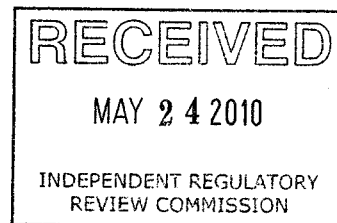

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

KEEP THE WATER CLEAN!

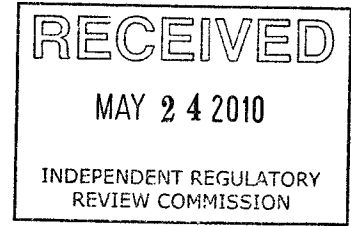

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Ms. gabrielle corso

Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. We have seen all too clearly recently the disaster that inadequate and lax regulation of the oil industry can lead to in the Gulf of Mexico. BP can laugh at a \$500 million dollar cleanup bill, with profits of \$6.1 billion. Who knows what disaster the natural gas industry, if not sufficiently regulated, might inflict on Pennsylvania?

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

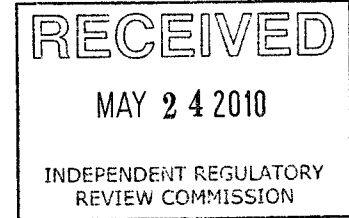

Sincerely,

Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

As a fly fisherman, I recognize that Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. My cabin in Potter County will have two well sites a half mile away. I am not happy about this but I don't have any recourse except to assure that these drilling activities are performed under proper regulations and that they are enforced to the fullest. You can look anywhere in this state and see the results of years of coal mining. AMD is still a serious problem in many watersheds yet we go full speed ahead on gas drilling without knowing the consequences. Our children and grandchildren should not have to pay for our oversights.

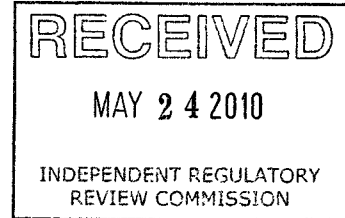

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Ms. Kenneth Rose

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

As a resident of Murrysville, PA, in just the last two years we have seen three terrible contaminations of Haymaker Run, and Turtle Creek. Twice the contamination was by a gas leak. The third was by chemicals from cement being dumped into the stream where a bridge was being built. All three times the devastation was total, killing everything immediately downstream and continuing to negatively affect the stream for miles.

I have also witnessed first hand the destruction of small woodland streams by a gas drilling company. Despite the fact that the clean streams law was violated, I was shocked to see that the company's fines were insignificant. In my opinion, there are not nearly enough resources in place to protect our streams. Streams are one of Pennsylvania's greatest natural resources. Please do what is in your power to protect them.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

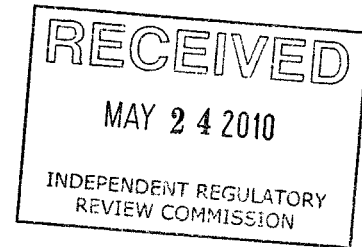

Ms. Cary Bohl

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

The Marcellus Shale is money in the bank. Let's make sure that all work is performed correctly and keep PA healthy and GREEN. Regulate it while impose a severance tax on these drillers, many of which come from out of state merely for profit. All Pennsylvanians have a bigger stake in this issue- Preserving our water!

s

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

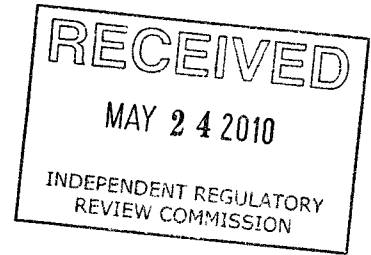

Mrs. Jean Friday

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Our family home is along side of Harvey's Creek on Route 29 just a mile south of Moon Lake Park. My nephew learned water quality testing in college this past year and checked out the stream last weekend. He said it's one of the cleanest streams he's seen in Pennsylvania. Please help pass and write new legislation to keep all the streams in Pennsylvania clean and healthy. Please adopt the laws that will place buffer areas around the streams and reservoirs here. Please make sure that there are strict compliance laws that the gas drilling companies must abide by - so that we don't face the same kind of disaster they are facing along the Gulf. We have no one but you, our legislators, to look to to protect us. Thank you for all your efforts in the face of the tremendous pressure the gas companies put on you.

All you do for us and our children and their children is deeply appreciated.

Betsy Comiskey

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. How have these companies been able to inject undisclosed chemicals in unknown amounts into our aquifers without any legislative oversight? These end up in our waterways, creating fishkills, and end up in our wells creating immediate human health hazards, including cancer. Would you want these risks in your backyard? Please demonstrate that you are more sensitive to the long-term environmental needs and fragile eco and hydrospheres, than to the immediate needs of your favorite lobbyists. Your grandchildren's children will thank you.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

It is imperative that we continue to protect our beautiful rivers and stream. I believe we must have a strong energy policy but to become energy independent we must NEVER jeopardize our environment in the process of drilling for the energy resources we have in our state or country.

We MUST NEVER have another mistake like we have going on in the Gulf now.

PROVEN safeguards and procedure should be used with competent, professional monitoring to insure NO shortcuts are taken.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

It is heart sickening to realize that I as born in a polluted state(commonwealth), where all of the fish are contaminated. Starting on page 33 to page 36 inclusive from the 2010 Pennsylvania Summary of Fishing Regulations and Laws, states all of the toxins in all of the fish in the state, and how much intake you can eat before you die. This was one of my deciding factors that made me leave this commonwealth, and be gone for 32 years. I returned to help with taking care of Family, but I would never have returned. I am very depressed that I cannot even eat a trout that I catch, not knowing what I am eating, and I do not possess a chemical photo spectrometer to analyze the toxins.

I did live in very Northern California, and that is a comparison equal to the sun and moon. If you think the streams and waterways are in trouble, "they just built million dollar homes" in Pittsburgh with unhealthy toxic levels of Cadmium. Since I am physically disabled, I would enjoy eating a good piece of fish, but I have to go to a fish market? I have always practiced "catch and release", but the water is also polluted.....so what is a poor boy to do?

Sincerely Your,  
Preston Schwartz R.N. (ret)

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

As a landscape photographer I have traveled throughout the Endless Mountains where a great portion of gas drilling is taking place. Many of these areas have remained untouched for generations and are now being threatened by drilling operations. There must be some type of legislation to protect the animal habitats and the streams and rivers from drilling operations. Already much of the the once pristine landscape is being destroyed. It really is the only natural asset this state has.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I've been fishing and hiking near Tionesta, PA since I was eleven years old. This is an area of natural beauty that can never be replaced and a true Pennsylvania treasure. So little of Allegheny National Forest has been set aside as wilderness area. Much less than even the National Forests in West Virginia! Please don't let gas drilling destroy our streams and rivers. I've already seen my groundwater destroyed by Rosebud Mining and have suffered through "good enough" remediation as spelled out in Act 54. I've been paying taxes here in South Buffalo Township and Pennsylvania for over fifty years. Do something for residents and tax payers for a change. This was once a great place to live and raise a family, not so today. Stop the exploitation of western Pennsylvania.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

As I was working on getting information from archival books for a speech I will be giving on the 300th Anniversary of the first European settlement in present day Lancaster County, Rupp's History of Lancaster County printed in 1844 stated that there were SALMON in our streams!!!

How far we have digressed!

I can not even begin to imagine a salmon even wanting to live in our streams in the pathetic condition we Europeans have left them. It is well beyond time to restore our county heritage, by cleaning up these filthy streams, so our grandchildren can once again fish, AND EAT, from the streams we live by everyday.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Profits over nature...does BP come to mind.

Protect our forests and water.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

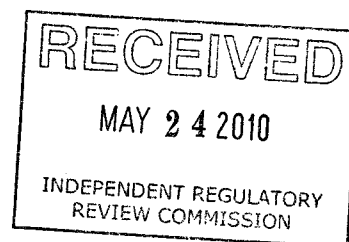

Mr. Gerald Ellefson  
36 S Steeplechase  
Gettysburg, PA 17325-7885

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

As an environmental educator who teaches stream studies at BVA and Paradise Farms Camps here in Downingtown, I am particularly concerned about the overall health of the Pennsylvania watersheds, and the impact of the natural gas drilling here in our great state.

I know you've been a fighter for conservation issues locally, Mr. Dinnimin, and I look forward to your support in this matter of protecting our streams and rivers!

Thank you for all of your hard work and efforts!

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

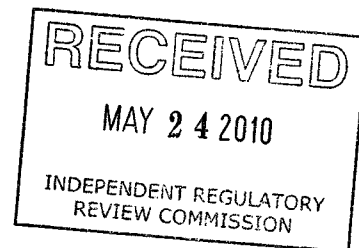

Ms. Holly Merker

I value the streams in the park system here in Allentown almost more than anything else in my life. Through the observation and study of water and in turn, the worlds within, the connections and functions of a system become so apparent that the idea of the self becomes magnified by the surroundings.

To see our water ways in the sorry state they are in is disgusting, sad, and the antithesis of stewardship. In a world where ecological catastrophes are becoming commonplace, you can help prevent another one from happening.

Please, do it. Step up, swing away and make a difference.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. The methods for extracting gas from Marcellus shale are EXTREMELY water-intensive, and the fracked water becomes a very significant pollutant. All life depends on access to clean water. Agriculture, tourism, biodiversity, recreation, and much more depend on clean sources of water. It is extremely important to prevent degradation before it starts rather than find ourselves in still another "Superfund" or "AMD"-type situation where the taxpayers are cleaning up messes left behind by people and corporations that essentially took the money and ran.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Have we learned nothing from the past contamination and destruction of our natural world around us by drilling, digging, mining for dirty energy sources which only go on to pollute again and again. It's time to seriously go green and clean. We can do this, we are the country of innovation, we just need to fund it like we fund defense in this country, and this is truly a form of defense on many levels .

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Also, an important source of income for our state would be an extraction tax on the natural gas taken from the Marcellus Shale. This tax would provide funds to help pay down our growing deficit. The money could also be used to help manage the environmental impact of gas drilling.

A similar tax has already been enacted by 28 other states with similar natural resources' opportunities. It would not discourage the development of this industry, there's too much money to be made.

Support the responsible management and use of our natural resources.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

IRRC Regulator  
PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

All the natural gas and enormous amounts of money is NO substitute for Clean Water. Stop the drilling until REAL safeguards are in place.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. Jay Harter  
1785 Harmony Rd  
Susquehanna, PA 18847-7638

IRRC Regulator  
PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I am very concerned with our water resources. Especially with all of the new drilling for the MS natural gas "explosion". There are heavy metals in the water and it would be all too easy for an accident and contamination.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

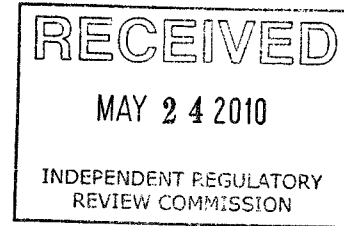

Mr. Stacy Imler  
45 Germania St Apt 2  
Galeton, PA 16922-1263

Dear State Senator McIlhinney, Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. We can't allow drilling for gas and oil on any land, private or public without adequate protections for the environment and the miners who work our mines and our open pit and mountain removal operations. If they drill and contaminate the ground water or the land, they must pay for the clean up. In order to monitor the drilling and extracting, they must pay for the added regulatory costs of inspectors overseeing their work. They have a lot of audacity and nerve to say they don't want to pay any taxes or fees for exploring and extracting oil or gas from publicly owned lands. They clearly own the government of Harrisburg, unless you stand up and say no. Which side are you on, the rich and environmental damaging gas and oil companies or the people and the environment? I and lots of other citizens are watching and waiting.

Sincerely,

Mr. Paul Roden

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. We cannot rely on the producing companies to put the best interests of the environment first. They are interested in one thing - \$\$\$\$\$\$ Even with the oil and gas industries assurances, there is no margin for error so the very strongest regulation is required. Had better regulation been in place, perhaps the current BP disaster in the Gulf might have been averted. But it's too late now. We don't want to be trying to reclaim our rivers and streams here after the drillers and producers have made a mess. We need to be smart and prevent it in the first place.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

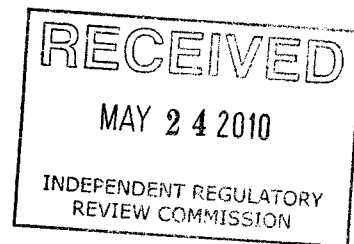

Mr. Samuel Wingard

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Please take the long view and support this intelligent, pro-active measure.

Where will we be in a number of years when our waters are so fouled due to a short sighted stampede to pull as much gas as possible in as short a time from the earth that there isn't enough drinking water for all?

This type of buffer zone should just be part of the cost of the project. Just like a housing developer is responsible for a site plan for run off water and so forth.

Since when is there open season on the lands of Pennsylvania? If they want something from us, let them take care and clean up after themselves.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

In addition to not allowing robber-baron business owners to pollute our waterways, I believe attention should be paid to our aging infrastructure and all the raw sewage that flows into our rivers. In my neighborhood, e.g., numerous homeowners cannot or will not pay for new sewer lines even though theirs have been broken for years and all the waste flows into our drinking water.

Furthermore, there is the factory-run off that seeps into our ground water in large parts of Pennsylvania making certain river water undrinkable!!

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

You have been absent from recent important meetings in many directions. Please report.

I want more than lip service.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

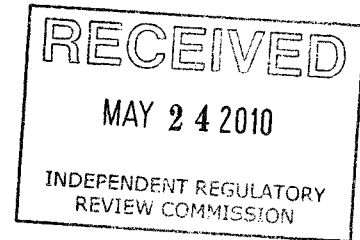

Sincerely,

Ms. Nancy Crane  
378 Bradley Ave  
State College, PA 16801-6322

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. This gas drilling process is already started north of Hughesville, Pa. and is ruining the natural beauty of that mountainous area. These guys are also drawing much too much water from streams and the river. Please do what you can to help by passing these regulations.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. David Clemens

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

My husband and I own property in Ward Township, Tioga County and we see the destruction that is going on up there because of the drilling for natural gas. They are dumping pollutants into Fall Brook creek. I am sure this is happening all over the Pennsylvania Wilds. We cannot allow this to continue to happen. Our great Wild Lands will be ruined.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

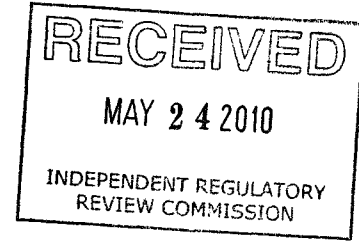

Mrs. Lisa Kretzman

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

We only have one planet earth. As a nation under the scrutiny of the world, but more importantly as people with children and a sense of what is right, I ask you to do not what is easy, but what is difficult - to protect our environment. Our monetary prosperity as a state depends on our natural resources. Do not succumb to the temptation of easy cash today at the expense of the quality of our state in the future.

Remember your role as government is to ensure a safe and even world for the citizens to live in, not the absolute and extreme pursuit of cash (there is more to wealth than simply money). While the gas drilling companies may cash in now, I don't see that money but I will bear the cost of their damage to the environment.

Please protect the streams and all the rest of our environment.

Sincerely,  
Mr. Gregory S. Larsen

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mr. Greg Larsen

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

LET'S GET REAL! frak gas drilling should not be allowed - too many toxic chemicals in air, land and water - more greenhouse gases than dirty coal -destroying our pristine lakes, forests and loss of habitat for millions of creatures. Millions of people downstream will be subjected to cancer causing chemicals in the water they drink and bathe in. SAY NO TO GAS DRILLING - WE WANT SOLAR AND WIND YESTERDAY - MANY COUNTRIES ARE AHEAD OF US WITH WIND ENERGY - LET'S FUND THAT INSTEAD OF BIG OIL AND GAS.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

In light of the recent drilling disasters, it is extremely hard to trust any of these drilling companies, no matter how sophisticated or safe that they claim their drilling methods to be. To them, it is all about making money and greed.

We need to take care of all of our precious natural resources and not simply exploit what happens to be there at the expense of our Earth and the citizens of this State. There MUST be more responsibility and accountability before we can agree to allow any more drilling of our natural resources. Proof of safety and proper regulation MUST occur before we can even begin to entertain drilling for Natural Gas in the State of Pennsylvania. The State of New York has very strict regulations when it comes to any type of drilling or mining in their State. We must enact similar rules in Pennsylvania if we want to preserve this State for all future generations.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

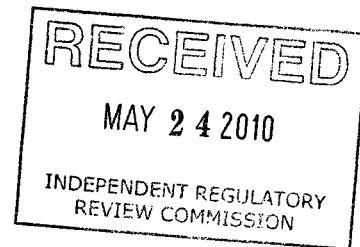

Sincerely,

Mr. Kevin Ryan

IRRC Regulator  
PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. The precious steam and river environments that make Pennsylvania a special place to live are continuously threatened by mining and gas drilling operations. Friends have lost the privacy of their home due gas drilling on the next property. Coal ash residue washes into the Delaware River. The activities poison our waters and make our lands unlivable. Do everything you can to stop the trend of giving away our environment to the companies who want to profit from our pain.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

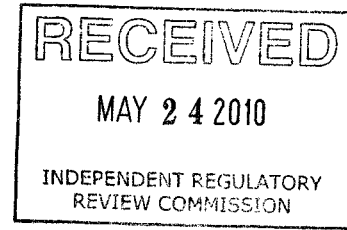

Mr. A. Robert Johnson  
705 Weygadt Dr  
Easton, PA 18042-1626

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I feel it is negligent of us to pollute our water sources to obtain the natural resource gas. If they must drill, they need to be responsible for cleaning the waste water from that activity. We need to protect our water sources.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mrs. Esther Ritchie

Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

There is a finite amount of fresh water in the whole world. Every time we pollute fresh water we harm our health, the economy (because we will inevitably have to clean it up), and the world. Pennsylvania must regulate gas drilling and create a safety zone between nature and drilling. please support the legislation to make this so.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Dr. Micheal Atherton
