RE: Chapter 95, wastewater-IRRC # 2806.  
Chapter 102, Erosion + Sedimentation Control E2B7  
46  
(IRRC # 2783, EQB-7-440)

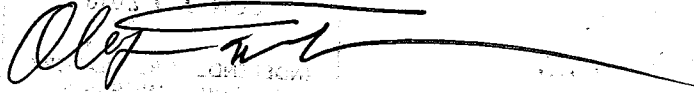

Dear ~~Congressman~~ <sup>Chairman</sup> Coccodrilli,

I am writing to call for your support on the following ~~the~~ regulations mentioned above. ~~to~~ These regulations serve to ~~protect~~ <sup>protect</sup> ~~the~~ water quality to sustain both human and ecological ~~the~~ health. Clean and safe drinking water is a right held by all Americans, which is threatened by the poor <sup>water</sup> standards ~~held~~ <sup>held</sup> ~~to~~ <sup>by the</sup> natural gas industry. Across the country, we have ~~seen~~ <sup>and in our own state,</sup> seen incidents ~~which reflect~~ in which water sources have been contaminated beyond levels safe for human or animal consumption.

I urge you to protect ~~for~~ our ~~our~~ water supplies for this generation and the next by increasing the regulations on wastewater produced by

Natural gas drilling.

Best wishes,

ALYSSA TOMBLER
