IRRC Regulator
PA

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Miss Nicole Erdley
515 Cherry St
Montoursville, PA 17754-1803

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Mrs. Marilyn Sutton Loos

Dear Regulator,

Please help protect water quality in our rivers and streams. Two important regulations are now before the Independent Regulatory Review Commission (Nos. 2783 and 2806). Amendments to 25 Pa. Code Chapter 95 require that gas drilling wastewater be treated before being discharged into our rivers and streams. Amendments to 25 Pa. Code Chapter 102 require a buffer zone for development activities along our Pennsylvania's best rivers and streams.

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

In fact, all streams and rivers become rain, springs, watersheds and all those things that we rely on for a basic need = hydration of our bodies and our foods. Poisoning one is poisoning all. Please help to keep us clean.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Sincerely,

Ms. Sally Hammerman
1020 E Street Rd
West Chester, PA 19382-8504

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

With the recent BP disaster in the Gulf of Mexico, now more than ever is the time to make sure energy companies put into practice safety procedures that will protect our most valuable resource, water. The mountains and forests of upstate and central Pennsylvania are a treasure to all who hike, live and work there. I spent many summers of my childhood, trekking through the woods and fields surrounding my grandparent's cabin outside of Sonestown and wish that our future generation's right to explore our natural treasures are protected.

I support the adoption of these regulations. Please let the Independent Regulatory Review Commission know you support them as well.

Senator White:

I am concerned that here in Butler County where our water quality is very poor...we currently have hydrogen sulfide odor in our water now that used to be crystal clear and not foul smelling. Farms near us are planning to drill for gas (Marcellus Shale deposits beneath us....and THORN CREEK is the run-off area for these farms...

I am VERY concerned that we will end up with the DRY LAND version of the BP OIL SPILL currently happening in the Gulf area. In addition...as far as I know Butler County has NO CONTINGENCY PLAN for folks that lose water or have well water that is not potable.

PLEASE....DEMAND that strict regulations be imposed on these drilling companies. Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them.

Dear Sen Costa,

Pennsylvania's streams and rivers are one of our most precious natural resources, and it is important that we do a better job to protect them. We need to be assured that no harmful solids or chemicals or pollutants will be spilled into any public water system, be it residential, recreational, or in a natural ecological state.

As our State Senator, you are charged with doing what is best for our state and for protecting ALL our resources. Strict standards need to be set for water safety & quality and polluters need to be fined...HEAVILY. They are making a profit out of destroy common property and green space. They need to STOP and they need to pay for remedying the damage already done. And they need to be routinely monitored.

Please protect our beautiful state.

Sincerely,
Isabel MacKinney-Smith
